

A horizontal black line represents a beam. Above the beam, from left to right, there is a dimension of 2.0 (CC) indicated by two vertical red tick marks. To the right of this, there is an angle of 60° indicated by a red line segment sloping downwards from the beam. Below the beam, from left to right, there is a dimension of 0.4 (OM) indicated by two vertical red tick marks. To the right of this, there is an angle of 0.14 indicated by a red line segment sloping downwards from the beam. Further to the right, another angle of 0.14 is indicated by a red line segment sloping downwards from the beam.
